

Cobbles and Boulders

With a large selection of Cobbles and Pebbles held in stock, we will normally be able to supply just the right materials for the effect and visual look that you desire. And if we don't have just the thing, we try our best to find exactly what you are seeking. Ideally suited for water features and general design use, these materials are some of the mainstays of garden design.

Boulders

Our natural boulders are principally Scottish but are sourced from all over the UK and Europe. With sizes ranging from a few kilos up to pieces weighing over a ton, natural boulders make such a difference to beach, stream, lake and pool schemes. It is worth remembering that a few larger boulders may have much more effect than many smaller ones.
