

Natural Stone Paving

Natural stone is one of the oldest and most beautiful of building materials. It brings an air of stylish elegance to any home and garden.

Each piece of natural stone is unique, displaying an infinite range of textures and breath taking colours. Our suppliers have searched the globe to bring you the most durable and beautiful examples of pure, hand-dressed natural stone.

Limestone is an attractive and very durable paving which has a softer surface than sandstone and features a variable, soft-riven, textured finish. We have selected 3 colours, all of which will compliment classic and contemporary gardens.

The dark tones of Black Kadapha will mellow over time as the product weathers to a stylish graphite grey, whilst the warm, subtle, golden shades of Buff gives a versatile paving a classic appearance that adds a timeless charm to any garden. Kota blue provides a contemporary blue/grey option.
